

# Don't Bite the Bait!

Please be aware of phishing schemes involving banks in attempt to acquire personal and financial information. These fraudulent emails will ask you to provide or update your bank information thru a link.

Do not click the link. It will direct you to a fake website that asks you to supply personal/confidential information.

Remember, banks will never ask you to provide any information they already have. There are procedures in place and proper channels for this kind of transaction.

In case you receive a suspicious email,  
**DO NOT RESPOND.**  
**NEVER CLICK ON THE LINK.**

Should you need to update or rectify your bank account details, please contact your maintaining branch.

This is a friendly reminder from the Philippine National Bank.
