INVESTMENT OBJECTIVE AND STRATEGY

The PNB Profit Dollar Intermediate Term Bond Fund is suited for investors in search of higher-earning investments for their US dollar funds. It is invested in a portfolio of fixed income instruments with a maximum weighted average duration of three years. The Fund aims to outperform its benchmark, which is the moving average of the yield of a 3 Year ROP instrument.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The PNB Profit Dollar Intermediate Term Bond Fund is suitable for investors who have moderate risk appetite.
- Participants are recommended to stay invested in the fund for at least three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- **Liquidity Risk** – The possibility for a Trustor to experience losses due to the Fund's inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- **Credit Risk** – The possibility for a Trustor to experience losses in the event the borrower/issuer defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade.
- **Reinvestment Risk** – This is the risk associated with the possibility that the funds may not be invested at the same rate as it was invested previously.
- **Interest Rate/Price Risk** – This is the possibility for a Trustor to experience losses due to changes in interest rates or due to a decline in the price of a security or a portfolio.

The Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVPu to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPu will fluctuate in relation to changes in interest rates. The Fund's investment strategy and processes are in accordance with the Trustee's written Desk Manual. Regulatory exposure limits are monitored on a regular basis.

COOLING OFF PROVISION

Cooling Off Period - The participant of the Fund may avail of the cooling-off period of two (2) business days immediately following the approval of the participation to cancel his participation without penalty, subject to submission of a written notice during the cooling off period.

- **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)**
- **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY**
- **WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT**
- **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE**

Weighted Ave. Duration	2.16
Volatility, Past 1 Year*	0.25%
Sharpe Ratio**	-0.86
Information Ratio***	-1.05

*Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time.

**Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

***Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

Portfolio Composition

MARKET OUTLOOK: ROP MARKET

Yields on US Treasuries were mostly higher month-on-month for March over inflation concerns and as market eyed key US jobs report (due last April 2) which could emphasize economy's health as vaccination rates fast-track. One year and less papers were down by an average of 2bps, while 2-, 3-, 5- and 7-year bonds higher by 3bps, 8bps, 21bps, and 28bps to yield at 0.16%, 0.35%, 0.92%, and 1.40%, respectively. Benchmark 10-yr, 20-yr, and 30-yr bonds were also up by 29bps, 20bps, and 18bps to end at 1.74%, 2.31%, and 2.41%, respectively.

The Institute for Supply Management (ISM) said its index of factory activity surged to a reading of 64.7 for March from 60.8 in February. This is driven by strong growth in new orders, the clearest sign yet that a much-anticipated economic growth was probably in progress. It is also the highest level since December 1983. This was followed by the news that nonfarm payrolls rose by 916,000 in March, ahead of the 660,000 estimates. Gains were strongest in leisure and hospitality which added 280,000 new jobs while construction soared by 110,000. Upbeat economic data in March shows a thriving economy that is boosted by increased vaccinations and massive fiscal stimulus.

US Pres. Biden unveiled a more than \$2 Trillion infrastructure and economic recovery package which will be spent over eight years and would raise corporate tax to 2.8% to fund it. Biden's plan included spending on transportation, broadband, and affordable housing. Biden hopes the package will create manufacturing jobs and rescue failing American infrastructure as the country tries to emerge from the shadow of COVID-19. Massive spending has raised fears that inflation will increase as the world's largest economy reopens, which sparked some sell-off in bonds.

Despite market concerns, Fed Chairman Jerome Powell has said the central bank will let inflation pick up faster if it helps achieve full employment. The Federal Reserve released minutes from its March 16-17 meeting and reiterated

FUND PERFORMANCE AND STATISTICS

that their accommodative policy stance is here to stay and will only be changed once outcomes are achieved and won't be adjusted based on forecasts.

We expect yields to move rangebound with a downward bias on evident signs of US economic rebound and that low-interest rate environment will likely persist.
