## MARKET OUTLOOK

### ROP MARKET

The US-China trade war has been a consistent source of market volatility. It has been more than a year since it started to affected the financial markets - equities, bonds and currency market. News on geopolitical tensions and the impeachment proceedings versus US President Trump also contributed to market volatility.

Yield of the benchmark 10Y US Treasury bond ended higher by 16.86 basis point month-on-month from 1.4994% in August versus 1.6680% in September after it touched a low of 1.4590%

At the local front, BPI and RCBC issued dollar denominated bonds. Both issuances are qualified under the Green Finance Framework.

We expect sovereigns to keep tracking the movement of US Treasuries, the developments in the US-China trade war as well as geopolitical tensions happening around the globe.

The Fund will continue to invest in high yielding deposit instruments.
